

AXIOHM's KRMG kiosk printers equip IER newest LISA self service stamping solutions

IER, leading manufacturer and supplier of turnkey ticketing solution and access control equipment retains the KRMG printer from the French manufacturer AXIOHM to equip its newest self-service kiosk LISA – stamps and postal labels vending machines, already deployed in most of the French post offices.

Montrouge, 27th February 2008 – AXIOHM, the French leading manufacturer of thermal printing solutions, announces the integration of its KRMG kiosk printers in the stamping self-service kiosk, designed by IER to equip La Poste, the French national postage company.

KRMG printer – La réponse idéale aux besoins d'IER

The printer aims at editing receipts and features the following characteristics:

- **Proven robustness:** An ultra resistant metallic frame ensures the extreme robustness and stability of the printer, which boosts an enhanced mechanical reliability guaranteed up to 50 km of paper and an auto cutter guaranteed up to 1 million cuts.
- **Paper autonomy:** Able to contain paper rolls up to 120mm of diameter, the printer offers all the necessary autonomy and low maintenance level required for self-service dispenser applications.

« We proposed the KRMG kiosk printer to our client IER as combining global outstanding performances, the printer was the most likely to respond specifically to our client's requirements. The KRMG was moreover particularly adapted to printing on thermal paper with a sensitive thermal layer in the inside of the paper roll », says Yves Le Peutrec, Sales Key Account Manager at AXIOHM.

« Our choice of the KRMG from Axiohm was guided by the printer's high reliability, its easy paper loading system and easy access to the paper path and perfect compatibility with the postage company's consumables. We have also been attracted by the simplicity of integration offered by the printing device in a turnkey solution and more specifically in IER's LISA vending machine, which fitted to perfection », adds Jean-Yves Le Meur, Business / Project Manager at IER.

All the means deployed at Axiohm to respond to the client's tight demands in terms of deadlines and delivery times demonstrate the capabilities of the French printer's manufacturer to adapt and be flexible to suit its client's requests.

So far, 300 KRMG printers were delivered and integrated into the LISA stamping self-service kiosks now in operation and on the field in many French post offices across the country. More purchasing orders from IER are expected in Q2 to pursue and complete the equipment of all the post offices on the French soil.

About AXIOHM

AXIOHM specializes in the design, manufacturing and marketing of a wide range of thermal printing solutions, including thermal printer mechanisms and controller boards, thermal receipt printers, and kiosk printers. Thanks to its mastery of thermal printing technology, AXIOHM has become a world leader in markets as varied as: Transportation, Hospitality/POS, Gaming/Lottery, Petrol Pumps, and EFT.
